

O₂xy Endodermia®

Unique, *clinically proven*

Anti-Cellulite programme!

Current studies in tissue physiology have placed more and more emphasis on the role of connective tissue in keeping skin looking young looking & healthy. Connective tissue exists right under the basal epidermis membrane, continues into the dermis, right up to the hypodermis. The collagen fibres in this tissue are responsible for tone and elasticity.

Connective tissue can suffer a decline in the blood nutrition and lymph-vein draining systems, the metabolic activities of the cellular elements slow down and oxygenation is poor. Cellulite accumulation is a typical result. By increasing the oxygen & blood flow to the tissues we can combat resulting skin flaws. Connective stimulation in areas that are rich in fat cells increases the secretion processes of the adipose system & stimulates adipose tissue to release mediators that accelerate lipolysis and heat loss

OxyEndodermia is an innovative, proven system specially designed for this purpose. Studies show that massage cycles, performed 3 times a week, have significantly reduced flaccid tissue, edemas, cellulite accumulation, recently formed stretch-marks & double chin symptoms in a very short time (8 – 12 sessions). Results are particularly impressive when the treatment is used on obese individuals with significant volume reductions.

OXYENDODERMIA

Two Dimensional Massage

With **special face and body hand-pieces** a delicate massage of the skin uses pressure & vacuum to,

- Stimulate blood circulation
- Stimulate lymph circulation,
- Improve oxygenation
- Boost metabolic exchanges.
- Promote the flow of new nutritional elements
- Encourage the removal of waste
- Stimulate the production of fibroblasts, responsible for the look & suppleness of skin.
- Remodel the figure by toning and vascularization.
- Provide a controlled vacuum without causing any form of trauma or collapse.

Only from OxyMegaStation!

Heart beat syncro massage, only available from OXYLife, **optimizes** the toning & vascularising power of this deep tissue massage. Works in harmony with the body's rhythm to treat skin flaws associated with cellulite & fatty tissue accumulation.

O₂xygen Infusion

Nourish, Revitalize & Moisturize

Stage II of the treatment involves **Oxygen Infusion** -- channeling active Meso-Aesthetic principals to reach the most vital layers of the skin & to act from the inside.

High pressure, pure, pulsed oxygen improves the penetration & absorption of special serums, making **OxyMegastation** a **truly effective complement for or even alternative to Mesotherapy.**

In addition to Body Treatments, **OxyMegaStation** offers unique facial treatments & meso-lifting.

TREAT:

- Acne
- Pigmentation
- Eczema
- Psoriasis
- Reconstruction of damaged skin
